

TEXTILE AND LEATHER INDUSTRY OF MEĐIMURJE COUNTY

EXPERIENCE AND KNOWLEDGE GAINED
ACROSS GENERATIONS

TEXTILE AND LEATHER INDUSTRY

EXPERIENCE AND KNOWLEDGE GAINED ACROSS GENERATIONS

Međimurje is a region located in the north of Croatia, known by the entrepreneurial spirit of its inhabitants and its quality of life, as well as productive, resourceful and modest people.

The textile and leather industry has played a great role in the industrial development of Međimurje in the 20th century and still represents a significant factor in the economy. Numerous small local enterprises maintain their market position in this highly competitive sector through innovation, knowledge and flexibility. On the other hand, Međimurje is the home of many global textile and footwear companies that achieve the highest standards of productivity and product quality in Međimurje.

This brochure is an introduction to the potential of several companies in Međimurje in the textile and leather industry, as well as an indication of significant capacities existing in a relatively small area with the ability to embrace new business ventures and provide the highest standards of services and products.

We look forward to meeting you in Međimurje!

MTČ Tvornica trikotaže Plc. Štrigova

MTČ Tvornica trikotaže (Knitwear Factory) Plc. Štrigova is one of Croatia's greatest producers of clothing items for children and babies using high quality cotton materials that are OEKO certified. In their business operations the company strives to maintain the long-standing textile tradition of MTČ (Međimurje Knitwear Čakovec), as well as to increase production levels, market placement on domestic and foreign markets and the number of employees in the knitwear industry through continuous investment. The previous few years have been a period of production specialisation directed completely at satisfying consumer needs. The same perspective is maintained in product placement on the domestic and foreign markets, where great importance is given to quality.

The updated machinery significantly contributes to competitiveness in terms of quality and market price, which in itself enables an expected increase in product placement on a wider European market.

Types of products/services	Knitwear items for babies and children, men's and women's underwear, sleepwear and leisure wear
Technological capabilities in production	Tailoring, sewing, the LECTRA system of designing, drawing, grading and printing cutting patterns

THE METAL INDUSTRY

Metal processing is not only a branch of industry and source of income in Medimurje, but much more than that. Experience, knowledge and skills have been gained across generations and have made the metal-processing industry the most propulsive and promising sector of the economy. About 165 metal companies manufacture various components and products every day with the aid of advanced technology, with products ranging from small tools to railway carriages, exported mainly to the countries in the European Union.

INFORMATION AND COMMUNICATION TECHNOLOGIES

Information and communication technology presents a relatively new sector in the Medimurje economy. Proactive and increasingly successful companies, offering a wide range of IT services and solutions, keep pace with global trends, continually enhance their skills and pool of experts, and seek new markets and opportunities. A system of business support for ICT includes the Technology Innovation Centre Medimurje with a business incubator for start-up entrepreneurs, as well as institutions of higher education with relevant study programmes.
